Amendments to the Specification:

Please replace the paragraph on page 6, beginning at line 25 with the following amended paragraph:

FIG. 5[[A]] illustrates one implementation of system 200. Members 201 and 203 use a client software 502 and a web browser 504 executed on client computers 202 (not shown in FIG. 5[[A]]) to access a web browser 506 executed on server computer 206 (not shown in FIG. 5[[A]]) over network 208. Client software 502, web browser 504, and a web server 506 are, e.g., an OLE control extension (OCX) program module, Microsoft Internet Explorer, and Microsoft Information Server (IIS), respectively. Network 208 includes local area network, Intranet, and the Internet. Web server 506 delivers (e.g., serves up) Active Server pages (ASP), dynamic hypertext markup language (XML) files (collectively known as "508") to web browser 504.
